The Naturopathic treatment of cancer and chronic diseases

Abstract:

These days, more and more people are seeking alternative, integrative natural therapies to complement their traditional medical care OR in place of their conventional medical treatment. The immunotherapeutic stimulation of the patients own immune response is an important and integral factor for fighting cancer at it's optimum to "seek out" and destroy the malignant cells through immunomodulating properties activating macrophages, natural killer {NK} cells and T cells to attack the tumor cells along with lymphokines, interleukin 1 and 2, CD4 and CD8 to activate the cell mediated response. The research being clinically evidenced based, reveals an effective, organic, sustainable and safe naturopathic plant-based product, a proprietary compounded blend, physician formulated, that has shown great success with cancers, chronic diseases and the COVID=19 virus, with a successful track record for more than twenty years. It is my pursuit to help as many people as possible with this innovative, revolutionary and unique product by improving the outcomes for patients with a better chance to live longer and thrive with this natural plant-based immunotherapy.

Biography

Eric A. Scheinbart, MD practices Integrative and Alternative medicine for cancer and chronic diseases. For more than twenty years, with the conviction to improve health, longevity and the quality of life with Naturopathic Immunotherapies of plant based, organic compounded proprietary blend that stimulates the patient's natural immune system to heal itself.
